Burmeier at its new location in Hiddenhausen –  
take a look at the FORUM article here

## Burmeier – safe living at home

In the near future, caring for relatives at home will influence social life in Europe like hardly any other topic. Modern care beds make a significant contribution to helping different generations live together successfully. Burmeier has been the leading specialist for home care beds and furniture in Germany for decades. From our new location in Hiddenhausen, Westphalia, we can meet your requirements even faster and more conveniently.

### Take advantage of these benefits:

- An ultra-modern digital logistics centre makes nationwide delivery times of just 24 to 48 hours possible
- More than 120 years of experience with medical beds, as part of the Stieglmeyer-Group
- Family-run company with innovative spirit
- Promoting contemporary care through modern concepts such as low-height beds and split safety sides
- Homelike beds with many design options for private customers
- The highest safety and quality standards, assured by extensive product testing above and beyond the standard requirements

## At Burmeier, we attach great value to sustainability

Ethical behaviour, environmental protection and the elimination of discrimination are essential goals for every company today. As part of the Stieglmeyer-Group, Burmeier has been actively involved in shaping this development for many years. Respect, tolerance, honesty and fairness towards each other and towards our customers are our guiding principles. We are also pursuing many ambitious goals in the area of sustainability.

### Careful use of raw materials:

In our wood production facility in Nordhausen, 95% of the wood and wooden materials used come from sustainable forestry and are certified according to FSC or PEFC. This means that for every tree felled, a new tree is planted.

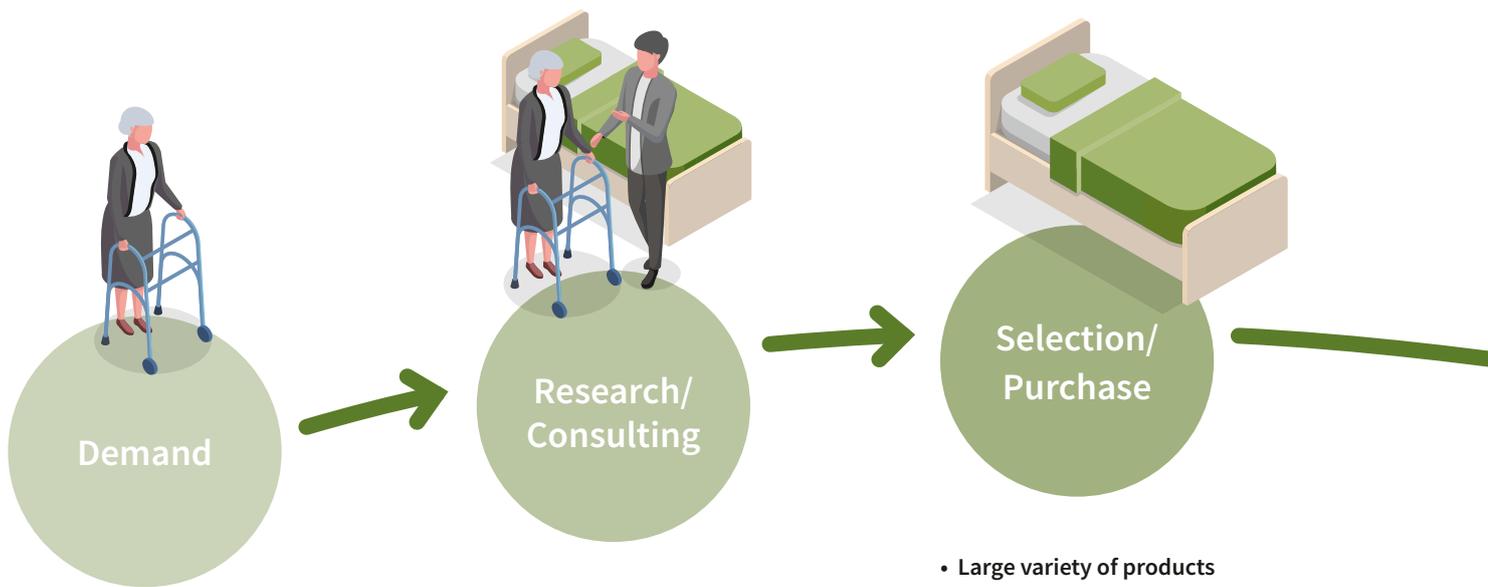

### Environmental protection and energy efficiency:

With solar systems on its roofs, the Stieglmeyer-Group feeds energy into the power grid and helps to reduce CO2 emissions. Our company operates a certified energy management system in accordance with DIN EN ISO 50001. Our state-of-the-art fleet of lorries and carefully optimised route planning also help ensure low CO2 emissions.

### Digitalisation:

In our everyday working lives, digitalisation helps to conserve resources. Paper is become rare in our offices. Instead of travelling long distances to meetings, we hold many meetings as video conferences. In our international company, with locations from Finland to South Africa, this results in a significant reduction in emissions.

# Our support for your processes

In many countries, the demand for age-related and medically-indicated aids such as care beds is driven by demographic change. In Germany alone, for example, more than 3.3 million people are cared for at home.\*

\*(Source: Statista)

- Customer-centred product descriptions
- Dealer search under burmeier.com
- Easily understandable, comprehensive information materials
- Optimal advice via configuration sheets
- The right care bed to suit specific medical requirements

- Large variety of products
- Telephone support
- Personal consultation and assistance from our retailers
- The highest quality and safety standards
- Reliable spare parts service
- Extensive cross-selling and up-selling potential thanks to bedside cabinets and mattresses

Robert Spencer,  
Branch Manager,  
medical supplies store

“Burmeier supplies me with high-quality products and spare parts with long-term availability. The company’s competent service is always available and gives me the security I need for my retail business with care beds.”

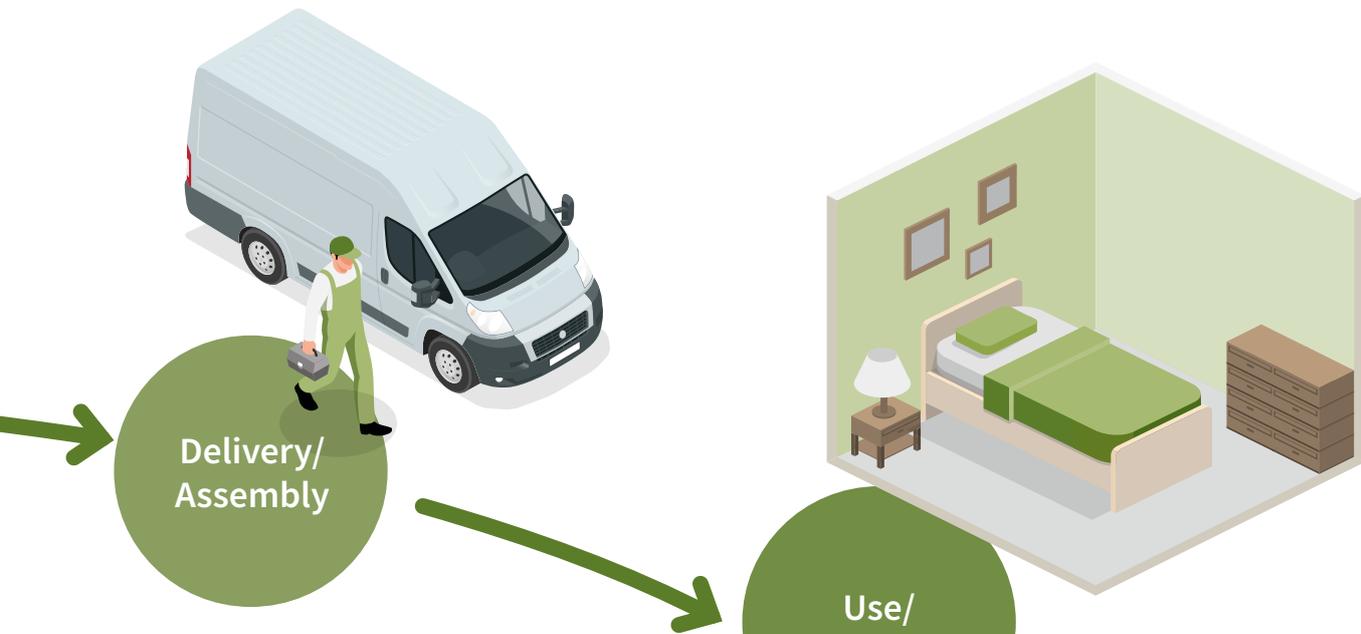

Maggy Smith,  
occupational therapist

“A high level of comfort and safety combined with benefits regarding care. Burmeier’s care beds offer ideal support during everyday work.”

Dave Johnson,  
rehabilitation clinic  
technician

“Burmeier beds can be assembled effortlessly and really quickly. The high quality of the beds keeps the claims quota low – and if we need replacement parts, they are delivered promptly. The personal support provided by Burmeier is exemplary.”

## Delivery/ Assembly

- Modern digital logistics centre
- Lean warehousing and uncomplicated replacement thanks to common parts strategy
- Quick and reliable delivery
- Space-saving installation of all components
- Easy one-person assembly
- Helpful assembly videos

## Use/ Experience

- Optimal user-friendliness, functionality and durability
- The high quality of the products guarantees a low claims and repairs quota

## Recommendations

- The satisfaction of all customer segments results in a high number of recommendations

Cathleen Turner,  
customer

“When I was suddenly faced with finding a care bed, I opted for Burmeier. The homelike design, comfort and high level of safety were what convinced me straight away. It’s great to find so much quality at such a good price/performance ratio.”

## Our key focuses and innovations

Further  
information on  
MDR

## Safety standards

All beds are designed for maximum safety as standard

### This includes:

- Primary fuse, electronic overload cut-off device and thermal fuse against overheating
- Motors run on safety extra-low voltage
- In-company quality standards exceed industry standard requirements
- Anti-kink strain relief on bed frame and on motor housing
- At least IPX4 splash-proof
- Optional IPX6 splash protection for automated reprocessing

The following standards and directives are applied

- Medical Device Regulation MDR – (2017/745)
- DIN EN 62353: Medical electrical equipment – Recurrent test and test after repair of medical electrical equipment
- DIN EN 12182: Technical aids for disabled persons
- DIN 32977: Adapted designing for disabled persons
- DIN EN 60601-1: Medical electrical equipment – General requirements for basic safety and essential performance
- DIN EN 60601-1-2: Medical electrical equipment – Collateral standard: Electromagnetic compatibility
- DIN EN 60601-1-6: Medical electrical equipment – Collateral standard: Suitability for intended use
- DIN EN 60601-2-52: Medical electrical equipment – Particular requirements for basic safety and essential performance of medical beds
- DIN EN ISO 14971: Medical devices – Application of risk management to medical devices

The SwitchMode power supply unit produces a 24-volt safety extra-low voltage directly at the socket.

## 24-volt drive system

Burmeier's innovative 24-volt drive system provides an ideal safety standard for caring for people at home. All live 230-volt components are banished from the care bed. Immediately downstream of the mains plug is a housing containing the **SwitchMode** electronic voltage transformer. Residents therefore enjoy a high level of safety.

### You have less work to do and your customer saves electricity!

The bed has no current-carrying components except when the handset is in use. Power consumption drops by up to 93% as a result. Even more costs and effort are saved by the fact that **leakage current measurements are no longer necessary**, as certified by **TÜV Rheinland**. In principle, the required leakage current measurement must be carried out every 2 years for care beds in commercial use. The use of the 24-volt drive system prolongs this interval so that measurements are not necessary within the expected lifetime of the care bed. The applicable lifetime is indicated in the operating instructions.

Even when taking the bed into service, leakage current measurements are unnecessary as these have already been carried out in the factory. It is also not necessary for **an electrically trained person** to be involved in assembling the bed – this saves the bed operator additional costs.

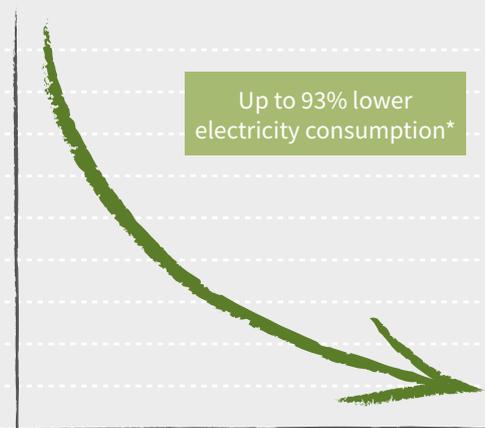

Robert Spencer,  
Branch Manager,  
medical supplies store

“Safety and compliance with regulatory standards are important aspects when procuring care beds. Burmeier is the trusted partner that we rely on here.”

### SAFE LIVING AT HOME

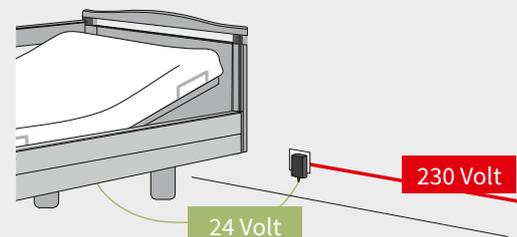

## Energy saving

\* Compared to 230-volt systems, assuming about 5 adjustments per day

### SAFE LIVING AT HOME

## Strong advantages

- Safety extra-low voltage starting from the transformer at the power socket
- No 230-volt components on the bed
- No leakage current measurements are necessary after installation or beyond during the expected service life of the bed
- A test certificate can be downloaded for every bed

## Econ drive system

For the models:  
Dali econ  
Dali low-econ  
Dali low-entry-econ

Most bed models in the Dali range are equipped with an electricity-saving 24-volt drive system as standard. In some countries, however, power plug standards apply that require the use of accessories in order to be compatible with the 24-volt drive system and its SwitchMode mains plug transformer. In this case, our Econ models with an **alternative drive** are an attractive, cost-effective choice.

Both the Dali and the Dali low-entry are available in the versions **Dali econ** and **Dali low-entry-econ**. A third model, the **Dali low-econ**, is also available, which does not exist in a 24-volt version.

All Econ beds have a safe, reliable and economical **230-volt drive**. With matching selectable mains plugs, these care beds are ready for international use wherever they are needed. The Econ model **handsets** are connected to the bed with a cable in the usual way. The handset can be used to selectively lock and unlock all adjustment functions. The Dali-Lock app cannot be used with the Econ beds.

The Dali low-econ budget-oriented low-height bed.

The Dali low-entry-econ low-height bed for ideal fall prevention.

The Econ drive system is available with many international power plugs.

The cabled handset of the Econ models can be attached flexibly to the safety side.

# Easy Switch

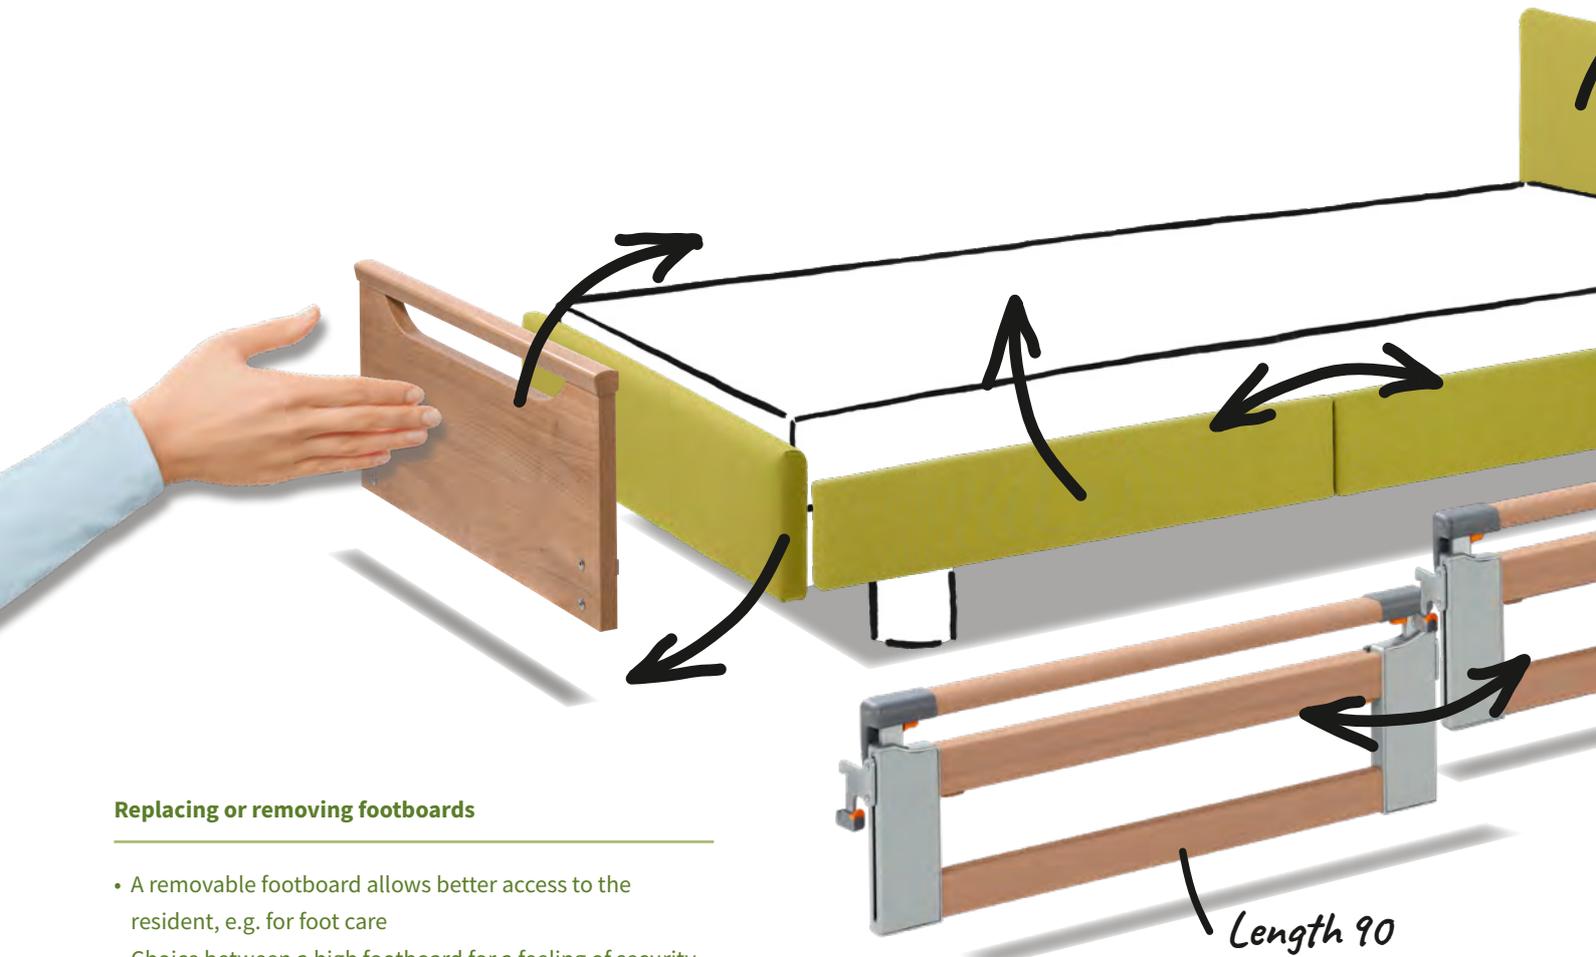

## Easy Switch for our Regia bed

The patented system for adaptable care beds with standard-compliant safety

Choose the Regia with the telescopic split safety side or without a safety side and benefit from our flexible Easy Switch system. The Easy Switch principle is as easy as it is impressive: The safety side elements, the headboard and footboard as well as the side panels can be attached and removed **without tools**. This is possible thanks to easy-to-use locks that snap into place securely and cannot be accidentally opened by the resident. Headboards and footboards from the Nobla range and also panels are available as an option with **attractive fabric or faux leather upholstery**.

### Modular design for tool-free assembly

Thanks to the Easy Switch system, the Regia can easily be fitted any time with safety sides or a new look and **adapted to your requirements**. It becomes a bed that develops with you and supports you in every phase of your life. The removable safety sides are quick to convert to whatever care situation may arise. They also make it considerably easier to assemble the bed.

### Replacing or removing footboards

- A removable footboard allows better access to the resident, e.g. for foot care
- Choice between a high footboard for a feeling of security or a low footboard for an unobstructed view
- Attractive wood decors, fabrics and faux leather available to choose from

**! Safety sides can be freely combined:  
• 110/90 or 90/110**

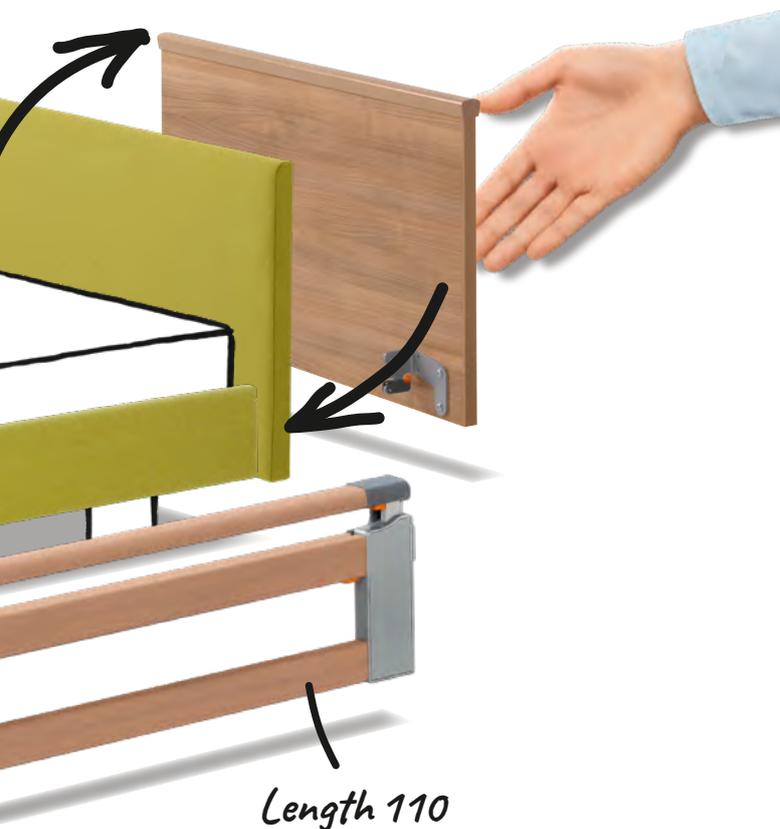

James Borrow,  
medical product consultant

“A bed that can be used and extended flexibly right from the start: for me, the perfect selling point.”

### Replace headboards in seconds whenever required

- Homelike design variants, with optional handle bars
- Attractive wood decors, fabrics and faux leather to choose from
- Headboard, footboard and side panels freely combinable however you wish

### Attach or remove split safety sides as required

- Two elements with lengths of 90 and 110 cm can be freely combined or used separately
- Use of only the 110 cm safety side element at the head end provides standard-compliant protection
- Use of only the 90 cm safety side element at the head end provides reassurance and orientation and leaves ample space to get in and out of bed

### SAFE LIVING AT HOME

## Easy Switch for added flexibility and safety

Beds with Easy Switch meet the different protection needs of residents and can be customised to suit any taste. The flexible safety side provides standard-compliant protection without restricting the mobility of the person in need of care.

▲ All Easy Switch elements are inserted into the bed frame and attached with easy-to-operate locks.

▲ Simply press the fastener upwards.

▲ The lock snaps into place securely – and the element is attached.

▲ To release the fastener again, pull the orange safety catch towards you and press down on the lock.

# On a safe trajectory through the challenges of care at home

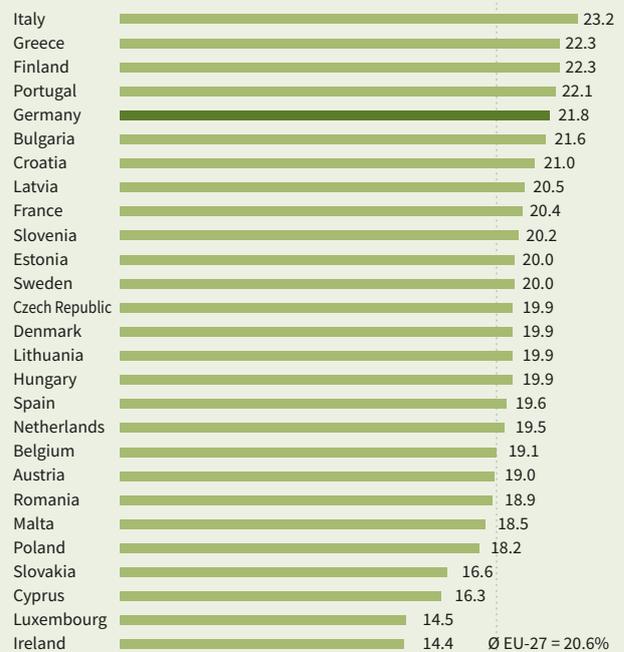

The number of people in need of care is rising even faster than expected. According to a current Barmer care report, there will be six million people in need of care in Germany by 2030: one million more than previously estimated. At the same time, the nursing staff shortage is worsening. Home care, which already accounts for 80 per cent of care cases today, will continue to gain in importance in the coming years.

In this situation, technically innovative aids and smart solutions are our strongest allies. Care beds from Burmeier provide noticeable physical relief for caring relatives. Low-height beds and split safety sides promote the mobility and health of the user while helping to reduce physical labour.

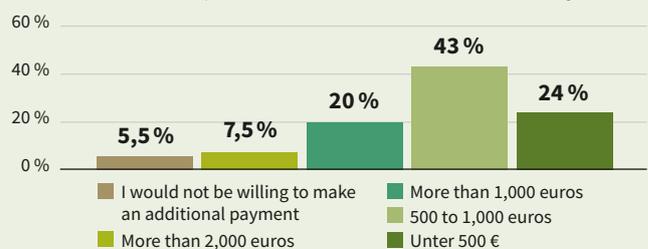

The medical supply trade and Burmeier cooperate successfully to guarantee a secure supply of care beds, mattresses and bedside cabinets. From versatile standard beds to heavy-duty beds, the joint portfolio meets all requirements. The technical possibilities range from moderate support in everyday life to a low-entry bed for fall prevention in severe dementia cases. Models such as the Regia and the Inovia are also an attractive option for private customers and open up new business opportunities for specialist dealers.

Individual support is also provided for these tailor-made products. Our Area Sales Managers and Burmeier's Marketing Department are always available as experts for you to contact. First-class service and comprehensive advice go without saying in our family-run company.

**Population above 65 years old in 2020\*<sup>1</sup>**  
in % of the entire population

**What would a new, customised care bed be worth to you?\***<sup>2</sup>

## Dali range

### Suitable for / Medical indication

- Standard bed with a good blend of protection and comfort
- Suitable for practically all care cases
- Easy for relatives to operate

### Special features

- With wireless or cabled handset
- Safety sides with Easy Click system
- Machine washable version
- 24-volt drive system dispenses with leakage current testing

## Lippe range/Relax

### Suitable for / Medical indication

- Ideal for people who want to keep their own familiar bed
- Suitable for low to moderate levels of care, where no sitting function or bed castors are required

### Special features

- Quickly assembled by just one person
- Small supporting frame for effortless installation in almost all bed frames
- Height adjustment from 29 - 74 cm
- Machine washable version

## Regia/Inovia

### Suitable for / Medical indication

- Optimal solution for all care requirements
- Ideal for patient mobilisation, thanks to split safety sides and a large height-adjustment range

### Special features

- Low-height bed for fall prevention
- Comfort and elegance for private customers
- Regia also available as a partner bed
- Choice of homelike decors, fabrics and faux leather

## Westfalia range

### Suitable for / Medical indication

- The ideal choice for durable, robust use in everyday care
- Particularly suitable for people who are still mobile and are able to sit in a chair

### Special features

- Care beds with stable scissor-type frame
- Attractive head and footboard designs
- Selectively lockable handset
- Cost-saving 24-volt drive system

## Lenus

### Suitable for / Medical indication

- Restless residents with low risk perception
- Persons with dementia and a tendency to wander

### Special features

- Low-height bed for fall prevention
- Easy transfer for wheelchair users
- Comfortable sitting position for mealtimes and leisure activities

## Heavy duty beds

### Suitable for / Medical indication

- Particularly suitable for heavy and obese residents
- All care requirements are met

### Special features

- High safe working load, up to 350 kg
- Mattress base widths up to 120 cm
- Better quality of life for heavier residents

## Bedside cabinets and side tables

### Suitable for / Medical indication

- Recommended for residents who cannot leave the bed to eat meals
- Ideal for use with low-height beds (Varus model)

### Special features

- Storage space for personal belongings and care utensils
- Ideal for drinks and meals taken in bed
- Convenient bookrests
- Good manoeuvrability for flexible use

## Mattresses, transport chair and furniture

### Suitable for / Medical indication

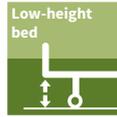

- Mattresses suitable for all Burmeier beds
- Help prevent bedsores, however there is no certified grade of effectiveness

### Special features

- Customised furnishings for care rooms
- Easily accessible storage space
- Safe and comfortable transfer in the Ravello transport chair

*Dali range*

Robert Spencer,  
Branch Manager,  
medical supplies store

**“Dali – when speed and reliability are called for.**

The Dali range offers a tried-and-tested combination of particularly reliable product characteristics and quick delivery times.

It is quite simply the absolute standard on the market!”

Dave Johnson,  
rehabilitation clinic  
technician

**“Dali wash – optimum hygiene in the battle against germs.**

Machine reprocessing of care beds saves time and money.

And protecting users and carers from multi-resistant pathogens is paramount.”

James Borrow,  
medical product consultant

**“Dali low-entry – the low-height bed for stringent requirements.**

With the low-height Dali low-entry, I have the ideal bed to offer residents who are particularly at risk of falling.”

## Dali

### Quick assembly and reliable operation

- ✓ Safe working load of 185 kg
- ✓ Maximum weight of resident: 155 kg
- ✓ Height adjustment range: 40-80 cm
- ✓ 24-volt drive system
- ✓ No leakage current measurements during expected service life
- ✓ Reverse-Trendelenburg position
- ✓ Tool-free safety side installation with Easy Click system
- ✓ Wireless or cabled handset

## Dali wash

### The bed for optimal hygiene

- ✓ Safe working load of 185 kg
- ✓ Maximum weight of resident: 155 kg
- ✓ Height adjustment range: 40-80 cm
- ✓ 24-volt drive system
- ✓ No leakage current measurements during expected service life

# Accessories and mattresses | Dali care bed

1 The adaptable safety side for Dali beds offers good protection and leaves enough space to get in and out of bed.

2 The clip-on safety side bar raises the side protection height by 18 cm.

A new safety-side height-extension rail will be available soon.

3 Standing aid.

4 5 Bed extension including safety side bars (also for retrofitting).

6 The filler piece can be fitted onto the full-length safety side to make it easier for residents to sit on the edge of the bed.

7 8 Homelike wooden surrounds for the head and footboards.

9 Reading lamp for easy insertion.  
10 Reading lamp for fixing to the patient lifting pole.

11 Mattress piece for bed extension.

12 With the help of the optional ratchet mechanism, the lower leg rest can be manually raised.

13 Soft foam-leather covers protect the resident when in contact with the safety sides and when leaving the bed.

14 The tray is simply placed on top of the raised safety side bars.

15 Elegant Softcovers for head/footboards and safety sides – available in six different colours.

16 The bars of the safety sides can be transported and stored even more easily with the carry bag.

17 Wall deflection roller protect the bed and the walls from damage.

## Dali low-entry low-height bed

Low-level entry thanks to height adjustment from 23 to 63 cm

175 kg safe working load, 4-section metal slatted mattress base, electrically adjustable

Assembly of safety sides with Easy Click system requires no tools

Ratchet mechanism for adjusting the lower leg rest

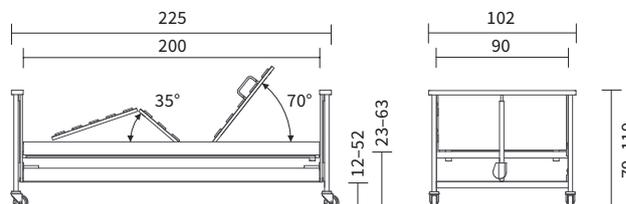

Reverse-Trendelenburg position can be set

Cost-saving 24-volt drive system

### Advantages:

- Helps prevent falls, without the use of liberty-depriving measures
- With its height adjustment range of 23 to 63 cm, it is close to the floor when at its lowest position
- Reduces the risk of injury should falls occur
- This makes it easier to decide not to use safety sides

### External dimensions/height adjustment range:

## Design details

### Reverse-Trendelenburg position

- Can help reduce reflux during the night

### Electronic SwitchMode power supply unit

- Integrated immediately downstream of the mains plug

### Connector socket with safety clip

- For connecting the electronic SwitchMode power supply unit
- The safety clip between the connector of the power supply unit and the socket on the bedframe ensures the reliable transfer of electricity and signals
- On all care beds with a 24-volt drive system

### Transportation and storage aid

- For compact delivery and storage

*Lippe range/Relax*

Robert Spencer,  
Branch Manager,  
medical supplies store

**“Lippe – the intelligent option for my customers.**

Bed inserts from the Lippe range have a particularly space-saving supporting frame and fit into practically any bed surround. I can offer these to almost all customers who want to keep their own familiar bed. The assembly work can be done by one person.”

Angelika Herder,  
customer

**“Relax – new design for my bedroom.**

Actually, I chose a Lippe bed insert because I wanted to keep my old bed. But then I felt like going for a new, more modern look. I really like the Relax bed surround.”

## Lippe IV

### The height-adjustable bed insert

- ✓ Safe working load of 200 kg
- ✓ Maximum weight of resident: 160 kg
- ✓ Height adjustment range: 29-74 cm
- ✓ 24-volt drive system
- ✓ No leakage current measurements during expected service life
- ✓ Mattress base dimensions of 80, 90 and 100 cm in width and 190 and 200 cm in length
- ✓ Space saving supporting frame measuring only 69 x 120 cm
- ✓ Secure and stable thanks to feet with floor-level adjustment screws

## Lippe IV washable

### The bed insert for optimal hygiene

- ✓ Safe working load of 200 kg
- ✓ Maximum weight of resident: 160 kg
- ✓ Height adjustment range: 29-74 cm
- ✓ 24-volt drive system
- ✓ No leakage current measurements during expected service life
- ✓ Machine washable for optimal hygiene
- ✓ Mattress base size 90 x 190 cm and 90 x 200 cm
- ✓ Selectively lockable handset
- ✓ Secure and stable thanks to feet with floor-level adjustment screws

## Lippe 120/140

### More space and comfort whatever the circumstances

- ✓ Safe working load of 250 kg
- ✓ Maximum weight of resident: 210 kg
- ✓ Height adjustment range: 29-74 cm
- ✓ 24-volt drive system
- ✓ No leakage current measurements during expected service life
- ✓ Selectively lockable handset
- ✓ Secure and stable thanks to feet with floor-level adjustment screws

## Relax

### The combinable, home-comfort bed surround

- ✓ Mattress base dimensions of 90, 100, 120 and 140 cm
- ✓ Lengths of 200 and 220 cm
- ✓ Headboard and footboard frames made of solid beech
- ✓ Panels and bed sides in Natural Beech, Royal Maple, Havana Cherry or Bella Noce Choco
- ✓ Optional wooden cover to bridge the middle gap of a double bed

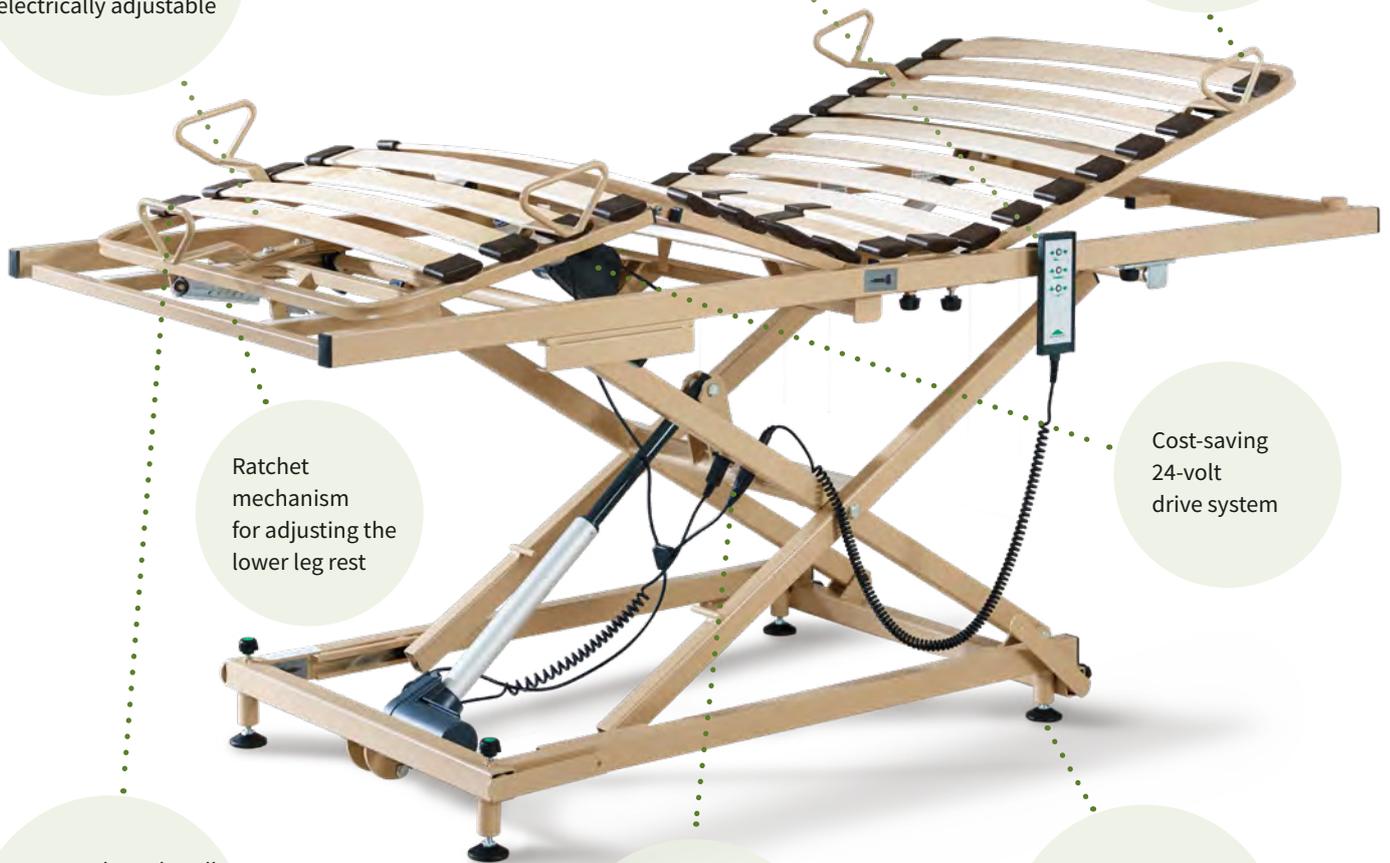

# Lippe IV bed insert

200 kg safe working load, 4-section mattress base, electrically adjustable

Handset with selective locking function as a standard feature

Mattress clamp handles can be adjusted to widen the mattress base by 5 cm

Ratchet mechanism for adjusting the lower leg rest

Cost-saving 24-volt drive system

Mattress clamp handle, mattress retainer bar at foot end allows the mattress base to be extended by 5 cm

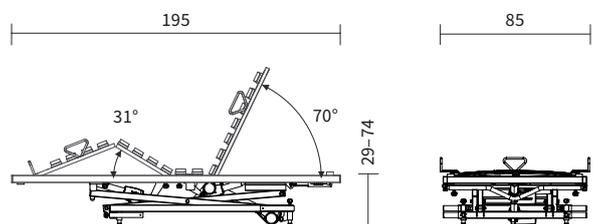

Small supporting frame measuring only 69 x 120 cm for effortless installation

Feet with floor-level adjustment screws and fixing lugs

## Advantages:

- Can be installed in an existing bedframe
- Offers all the advantages of an electrically adjustable care bed
- The large height-adjustment range makes getting out of bed easy and allows carers to work at an ergonomically ideal height

External dimensions/height adjustment range:

## Design details

### Mattress clamp handles

- For lengthening and widening by 5 cm respectively, detachable

### Electronic SwitchMode power supply unit

- Integrated immediately downstream of the mains plug

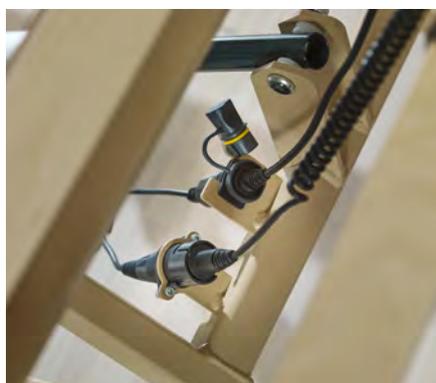

### Selectively lockable handset

### Feet

- With floor-level adjustment screws and fixing lugs

### Connection socket for the plug

- For connecting the electronic SwitchMode power supply unit

## Lippe IV washable bed insert

### Advantages:

- Designed to allow cleaning in automated washing systems
- Can be reprocessed without removing the drive system, thanks to the high protection category: IPX6
- Corrosion protection with cathodic dip coating (CDC) and holes that allow residual fluid to drain away

### External dimensions/height adjustment range:

## Design details

### Mattress clamp handles

- For lengthening and widening by 5 cm respectively, detachable

### Electronic SwitchMode power supply unit

- Integrated immediately downstream of the mains plug

### Selectively lockable handset

### Feet

- With floor-level adjustment screws and fixing lugs

### Connection socket for the plug

- For connecting the electronic SwitchMode power supply unit

### Transportation and storage aid

- With steerable castors

# Lippe 120/140 bed insert

250 kg safe working load, 4-section metal slatted mattress base, electrically adjustable

Comfortable 120 and 140 cm mattress base widths

Handset with selective locking function

Stable double scissor lift mechanism

Feet with floor-level adjustment screws and fixing lugs

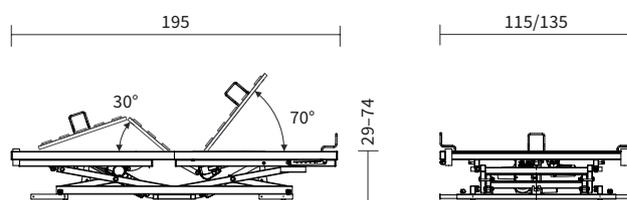

Mattress base divided in the middle

Power socket for connecting the electronic (SwitchMode) power supply unit

## Advantages:

- Offers plenty of space and comfort, with wider mattress bases measuring 120 and 140 cm
- With a high safe working load of 250 kg, it is a practical alternative to a heavy-duty bed
- Depending on the type of mattress and accessories used, it can accommodate residents who weigh more than 200 kg

## External dimensions/height adjustment range:

## Design details

- Feet**
- With floor-level adjustment screws and fixing lugs

- Ball bearing height adjustment**

- Electronic SwitchMode power supply unit**
- SwitchMode integrated immediately downstream of the mains plug

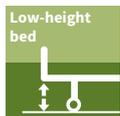

- Connection socket for the plug**
- For connecting the electronic SwitchMode power supply unit

- Low entry height**
- 29 cm – makes getting in and out of bed easier

*Regia/Inovia*

James Borrow,  
medical product consultant

**“Regia – the bed for comfort and a homelike feel.**

Many people in need of care, and their relatives, would like a level of comfort and style that goes beyond the standard. The Regia is an elegant model with a lot of options for creating an individual look. At the same time, it helps users to live independently.”

Sara and Robert McAllister,  
customers

**“Regia partner – the bed for couples to share a happy life together.**

My husband and I often need care support. But we can’t imagine lying in two care beds that are separated from each other. With the Regia partner care double bed, we can still live our lives together.”

## Regia

### A bed to satisfy high individual expectations

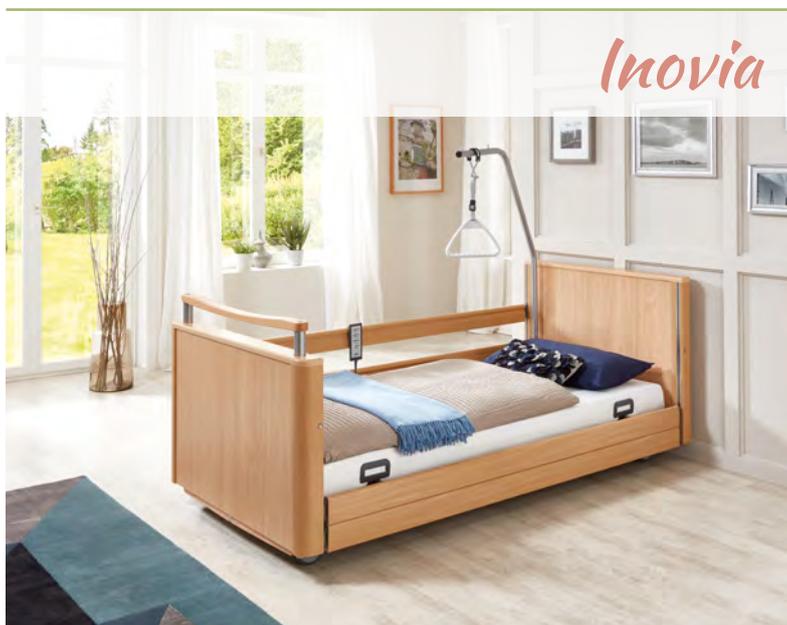

- ✓ Safe working load of 225 kg
- ✓ Maximum weight of resident: 195 kg
- ✓ Height adjustment range: 26-80 cm
- ✓ 24-volt drive system
- ✓ No leakage current measurements during expected service life
- ✓ Reverse-Trendelenburg position
- ✓ Backrest retraction in accordance with the recommendations of the German Nurses Association (DBfK)
- ✓ Split telescopic safety side with Easy Switch, or full-length safety side
- ✓ Choice of attractive wood decors and fabric or leather upholstery

## Regia partner

### The double bed for a fulfilled partnership

- ✓ Large height adjustment range of 26 – 80 cm
- ✓ Two mattress bases measuring 90 x 200 cm each
- ✓ Safe working load of 225 kg per mattress base
- ✓ Backrest and leg rest individually adjustable
- ✓ Height adjustment and a reverse-Trendelenburg position of the bed corpus are always synchronous, so do not pose a pinching hazard for users
- ✓ Bed frame surrounds and safety sides can be flexibly adapted with the Easy Switch system

## Inovia

### The bed with innovative ideas

- ✓ Safe working load of 225 kg
- ✓ Maximum weight of resident: 195 kg
- ✓ Height adjustment range: 22-77 cm
- ✓ 24-volt drive system
- ✓ No leakage current measurements during expected service life
- ✓ Reverse-Trendelenburg position
- ✓ Backrest retraction in accordance with the recommendations of the German Nurses Association (DBfK)
- ✓ Optional telescopic split safety side
- ✓ Attractive wood decors to choose from

# Regia low-height bed

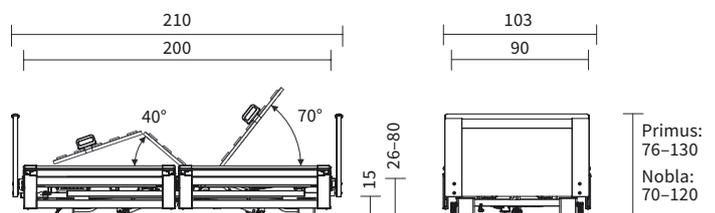

**Easy  
switch**

## Advantages:

- Elegant care bed for discerning private customers
- Low-height bed with large height-adjustment range
- The flexible Easy Switch system with optional split safety sides protects the resident from fall injuries, without the use of liberty-depriving measures

External dimensions/height adjustment range:

The homelike Regia low-height bed can be adapted to meet every comfort and protection need.

## Regia partner double bed

**Easy  
Switch**

Height adjustment and tilting to a reverse-Trendelenburg position are always synchronous, so do not pose a pinching hazard

Backrest and leg rests of the mattress base individually adjustable

Optional comfort mattress base made of free-floating elements can be placed on the metal slats

Safety sides, headboards, footboards and panels with the Easy Switch system, requiring no tools for fitting

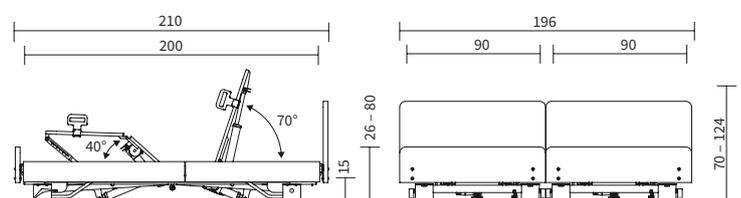

Both bed halves can be moved to a different location on stylishly covered castors

The bed halves can easily be separated and rejoined

### Advantages:

- The two halves of the bed can be separated and put back together again effortlessly
- Ideal for phases during which one partner is in need of care, or separate sleeping arrangements are necessary

External dimensions/height adjustment range:

Elegant upholstery or an attractive wood decor, side panels or safety sides – with the Regia partner double bed, couples are spoilt for choice.

#### Bed halves

- Separating the two halves of the bed facilitates bedside care and makes cleaning the room easier.

#### Handset

- One for each mattress base

*Lenus*

Maggy Smith,  
occupational therapist

**“Lenus – the bed for  
floor-level care at home.**

Low-height beds such as the Lenus offer an easy way of dramatically increasing the level of fall protection for users and offer good protection to dementia sufferers in particular.”

## Lenus

### The low-height bed for optimal fall prevention

- ✓ Large height adjustment range of 15 – 80 cm
- ✓ Automatic intermediate stops at 25 cm and at the standing up and transfer height of 38 cm
- ✓ Integrated 20-cm bed extension
- ✓ High safe working load of 225 kg
- ✓ Tool-free installation of full-length safety side with Easy Click
- ✓ Pinch protection at the lowest height through an acoustic signal and reduced-speed height adjustment

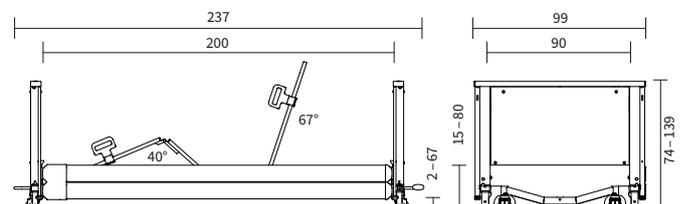

# Lenus low-height bed

## Advantages:

- The floor-level low-height bed protects particularly fall-prone users without restricting their mobility
- With its large height adjustment range from 15 to 80 cm, it meets all the requirements of a normal care bed and ensures back-friendly working
- It is particularly suitable for users with severe cognitive impairments, such as those caused by advanced dementia

## External dimensions/height adjustment range:

## Design details

Ergonomic sitting position.

Ideal height for care-giving.

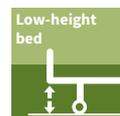

Tool-free removal/installation of safety sides.

Brake pedal accessible from the side.

# *Heavy duty beds*

Dave Johnson,  
rehabilitation clinic  
technician

**“Allura II – the heavy-duty bed that makes my work easy.**

For us technicians, assembling large, sturdy, heavy-duty beds is often challenging. This is why I am particularly pleased with the Easy Click system of the Allura II range. Now I can attach the safety sides in a matter of seconds.”

## Gigant

### The heavy-duty care bed

- ✓ Safe working load of 350 kg
- ✓ Maximum weight of resident: 280 kg
- ✓ Height adjustment range: 40-80 cm
- ✓ Reverse-Trendelenburg position
- ✓ Optional combinable safety side
- ✓ Headboards and footboard with elegant wooden surround

## Allura II

### Innovative care beds

- ✓ Safe working load of 250 kg
- ✓ Maximum weight of resident: 210 kg
- ✓ Height adjustment range: 30-80 cm
- ✓ 24-volt drive system
- ✓ No leakage current measurements during expected service life
- ✓ Reverse-Trendelenburg position
- ✓ Selectively lockable handset
- ✓ Mattress base widths of 100 and 120 cm
- ✓ Tool-free safety side installation with Easy Click system

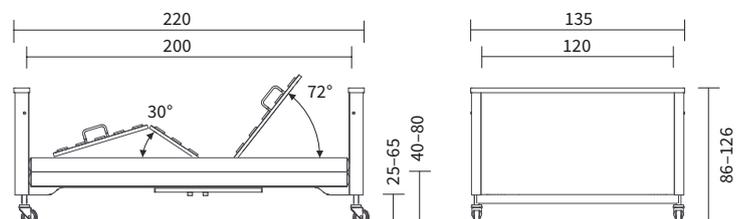

# Gigant heavy-duty bed

## Advantages:

- Supports a body weight of up to 280 kg, making it suitable for extremely obese persons
- Plenty of space and support for independent living
- Relieves the strain on carers

### External dimensions/height adjustment range:

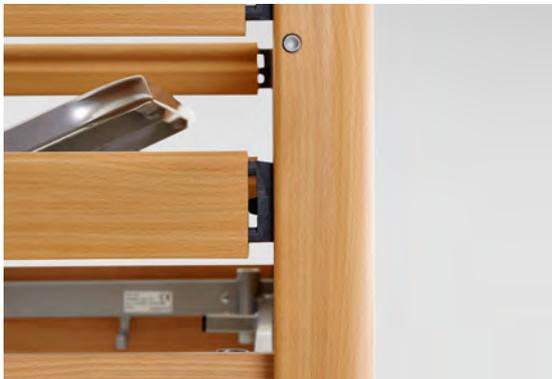

## Design details

Adapter sleeve for mobilisation support (left) and locking box (right)

Emergency release of the backrest

Extremely sturdy safety side construction

Plastic cladding around chassis  
• Ensures a homelike feel

### Special features:

Heavy-duty bed

High safe working load

350 kg

# *Bedside cabinets and side tables*

Robert Spencer,  
Branch Manager,  
medical supplies store

**“Bedside cabinets – attractive options for our customers.**

To go with a comfortable care bed you also need a suitable bedside cabinet on which to place drinks or care utensils. It’s great that we can offer our customers additional options in the form of Burmeier bedside cabinets, to increase their quality of life.”

James Borrow,  
medical product consultant

**“Bedside cabinets – an underappreciated companion in everyday life.**

When I advise my clients, they often feel that a bedside cabinet isn’t really necessary – any old side table will do, they think. After just a few days of care at home, however, many realise that this tailor-made companion is indispensable.”

## *Bedside cabinets and side tables*

### Practical and functional

When people requiring care are not able to leave their bed very often, it is all the more important that everyday things are within reach. Our feelgood bedside cabinets offer storage space and surfaces for placing care utensils, books and magazines, phones or a radio. With their help, it is much easier for residents to take part in everyday life. Fold-down, height-adjustable overbed tables are also ideal for eating meals in bed. Thanks to their castors, the bedside cabinets are easy to use anywhere.

## Bedside cabinets and side tables

Item number: 193753

### Cherusker bedside cabinet

With height-adjustable tilting overbed table, plastic-coated body, Beech decor.

#### Technical data:

Width: 52cm  
Height: 87cm  
Overall depth: 50cm  
Overall width (overbed table horizontal): 114cm  
Overbed table height adjusts from 82 to 112 cm  
Double castors Ø 50 mm, 2 locking castors

Item number: 236959

### Arminius bedside cabinet

With height-adjustable tilting overbed table, plastic-coated body, Beech decor.

#### Technical data:

Width: 54.5cm  
Height: 89cm

*Mattresses, transport chair  
and furniture*

Robert Spencer,  
Branch Manager,  
medical supplies store

**“Mattresses – important helpers in care at home.**

In home care, it isn't wise to settle for standard mattresses. For every Burmeier bed, we offer a perfectly matching mattress from the same manufacturer. This is the only way we can be sure that our customers have the comfort and protection they need.”

Jules Hammond,  
customer

**“I feel good on my Burmeier mattress.**

With my flexible Sky-fit mattress from Burmeier, I can really enjoy the sitting position and all the other adjustment options that my bed offers. The reinforced edge zones also make it easier for me to get out of bed without help.”

## Mattresses

### Well-being through comfort

- ✓ Pressure ulcer protection
- ✓ Reinforced edge zones
- ✓ Optimal lying comfort
- ✓ Pressure distribution protects against bedsores
- ✓ Reversible mattresses with one firm and one soft side
- ✓ Removable reversible cover with a soft comfort side and a robust hygienic side

## Ravello

### The transport chair for extra mobility

- ✓ Safe working load of 135 kg (dynamic), 200 kg (static)
- ✓ The lowerable armrests make it easy to get into the chair from the side
- ✓ The backrest can be lowered through 43° to a reclining position
- ✓ Ravello-sano: retractable footrest
- ✓ Ravello-curo: permanently fixed footrest moves with the lower leg rest during adjustments
- ✓ Ravello sano-s: 4 steerable castors for easy manoeuvring
- ✓ Ravello plus-s: height-adjustable seat

## Wardrobes and cabinets

### Flexible and functional

- ✓ Adrano furniture system with wardrobes and cupboards
- ✓ Options for creating personalised designs for bedrooms and living rooms
- ✓ Clear lines and a homelike wood decor
- ✓ Long service life thanks to high-quality materials
- ✓ Back panels with a thickness of 8 mm
- ✓ Wipe-clean base panel protects against moisture
- ✓ Underside of base panel is protected with ABS edging

## Chairs

### Sitting up and taking part in everyday life

- ✓ Suitable for residents' rooms as well as for communal and waiting areas in residences
- ✓ Ergonomic seat heights and armrests to offer secure support
- ✓ Users are able to take part in daily activities at eye level and maintain their mobility.
- ✓ Stacking chairs can be quickly and easily stacked to save space
- ✓ This is practical for floor cleaning as well as when reorganising the room for joint events

# Mattresses

Beds and  
mattresses from  
a single source

## Advantages:

- All mattress versions ensure a healthy, dry microclimate
- They adapt flexibly to the shape of the mattress base
- Pressure points are reduced
- The bed and mattress can be selected as a perfectly matching unit
- Pressure ulcer protection
- Long-term adaptation to the body shape of the user
- Uniform pressure relief

# Mattresses for a new sleep sensation

**Sky-fit care bed mattress (Art. no. 283924)**  
**The premium model to satisfy every requirement**

- The high-quality dual-layer mattress for Burmeier beds has a 2-cm-thick Sky-therm® layer and a 12-cm base layer made of cold foam
- Reinforced edge zones
- Adapts perfectly to the mattress base and follows every bed adjustment
- Removable, washable and reversible cover; one side is PU and the other polyester and viscose
- Compression hardness 5.0 kPa (edge zones), 4.0 kPa (base layer), 2.5 kPa (top layer), density 50 kg/m<sup>3</sup> (base), 40 kg/m<sup>3</sup> (top)

**Comfort-fit care bed mattress (Art. no. 300900)**  
**The high-quality mid-range mattress for healthy sleep**

- The comfortable mattress with a core made of elastic polyurethane cold foam (14 cm) for recuperative sleep
- Reinforced edge zones
- Adapts perfectly to the mattress base and follows every bed adjustment
- Removable, washable and reversible cover; one side is PU and the other polyester and viscose
- Compression hardness 5.0 kPa (edge zones), 4.0 kPa (base layer), density 40 kg/m<sup>3</sup>

**Basic-fit care bed mattress (Art. no. 261477)**  
**The basic entry-level model for everyday care**

- The modern care bed mattress with a polyurethane core (12 cm)
- Washable PU cover, white, removable, with zip fastening
- Density: 40 kg/m<sup>3</sup>, compression hardness: 4.5 kPa

**Cloud-fit heavy-duty mattress (Art. no. 283924)**  
**The versatile heavy-duty mattress**

- Particularly suitable for very heavy users with a body weight of 140 to 240 kg
- 3-layer mattress with a top layer made of comfortable Sky-therm® foam, and two resilient cold-foam layers
- Helps prevent pressure ulcers thanks to punched holes in the Sky-therm® foam; excellent point elasticity ensures pressure relief at sensitive points
- Optimal adaptation to the adjustments of the mattress base, thanks to incisions in the bottom cold-foam layer
- Removable reversible cover, one side polyurethane (PU), the other side polyester and viscose, which can be washed in a standard washing machine
- Mattress height of approx. 16 cm, which ensures a standard-compliant protective height of the safety sides on Burmeier care beds

**1** Sky-fit mattress without cover in the Regia care bed. Flexible Sky-therm® layer on top, and a base layer with incisions on the bottom.

**2** Comfort-fit mattress without cover, in the Inovia care bed. The side with the incisions can be turned to the top or bottom.

**3** Basic-fit mattress with cover, in the Dali care bed.

**4** Cloud-fit mattress without cover, in the Gigant heavy-duty bed. A top layer of viscoelastic Sky-therm®, and two resilient layers of cold foam underneath.

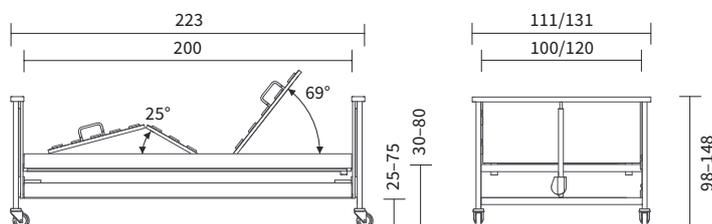

# Ravello transport chair

## Advantages:

- Ensures safe transport of people in need of care
- Its flexible design makes it easy for carers to transfer the user to the chair from an armchair or from the side of the bed.
- The cushioned, ergonomically shaped seat also makes the Ravello comfortable to sit in for longer periods.
- Easy-care, washable seat covers

External dimensions/height adjustment range:

---

## Design details

### Ravello sano

- The footrest can be completely retracted.

### Ravello curo

- The length-adjustable, fixed position footrest that tilts to follow backrest adjustments

### Armrest height adjustment

- In 6 stages

### Ravello sano-s

- For better manoeuvrability

Custodians of values  
Shapers of the future

## STIEGELMEYERGROUP

### Custodians of values

Our company was founded in Herford in 1900 and is still a family-run enterprise today. Respect and a sense of responsibility towards our customers, employees and partners form the basis for our day-to-day work. Based on these values and our many years of experience, we offer our customers all over the world high-quality products, solutions and services to meet the needs of the care and healthcare sectors.

### Shapers of the future

In order to cope with rapid changes in the care and healthcare sectors, we develop all our products ourselves. Creating innovations and visions of what care will be like in future are the goals we pursue. We maintain regular contact with our customers in order to support them in their daily tasks. Implementing tomorrow's trends today is a successful tradition of ours.

### Our expertise

- Hospital
- Nursing home
- Homecare
- Lifestyle beds
- Contract furniture
- Service

The Stiegelmeier-Group is your international partner for hospitals and care facilities and, with the Burmeier brand, also for home care. We support our customers with practical products, solutions and services, which we constantly develop further.

- Founded in 1900 and still family-run today
- Employs 1,100 members of staff worldwide
- Production of all core products in our own factories
- Product development and manufacture in Germany
- Servicing, training and process optimisation at the customer's site
- International certification and export to more than 60 countries
- Sales companies in Belgium, Finland, France, the Netherlands, Poland and South Africa
